Additional Information:

17) The barangay/Sitio/Watershed have an existing CBFM, CADC, ISF or similar Tenurial instruments approved or in process

Proposed Additional Criteria:

1. Accessibility of the barangay

That the barangay centers should be reachable by transportation (including 4-wheeled vehicle), permanently all year round.

2. There should be stable peace and order situation in the area

If the barangay or sitios are confirmed permanent hideouts of rebels, then safety is not assured. Hence, such area should be excluded.

3. Ownership of the land

That the household members are 75% landowners of the area of the clustered sitios and are residing or residents of the barangay.

Other Considerations:

1. On Protected Areas

All barangays/sitios that are inside protected areas should not be included especially in the subsequent barangays.

2. On Contiguity

In terms of barangays that are not contiguous but are necessary to be covered, there must be a **strong justification/reason** to this effect

3. On Farm Size

Proposed to be included as definition of the said criteria:

That 60% of the total land area coverage of the barangay are owned by small land owners and are residents of the barangay
